As a top-of-the-range variant of the 8 Series, the 850CSi took over from the prototype M8 variant. The 850CSi used the same engine as the 850i, which was tuned so significantly that BMW assigned it a new engine code: S70B56.

Only 1,510 examples of the 850CSi were ever built between August 1992 and November 1996.

Turning the key two notches announces BMW's familiar dashboard tone. The fuel pumps quietly hiss far in the background as they prime themselves for action. Twisting a third click engages the futuristic-sounding starter, whirring the 5.6-liter V-12 to life.

Versus the standard 850i's 5.0-liter V-12 (shared with the E32 750iL), the 850CSi's version received lighter pistons, a forged crankshaft, and more aggressive camshafts with freer flowing exhaust and intake. It was bored and stroked to increase displacement to 5.6 liters, compression was increased, and heavier duty engine and differential coolers were fitted, all compliments of the BMW Motorsport division. Power jumped to 375 hp while torque increased to 420 lb-ft. The extent of M modifications earned this engine

		<p>the coveted "S" designation code, signifying its official status as a true BMW Motorsport product. Dubbed S70B56, this engine was also the basic platform for the V-12 in the McLaren F1.</p> <p>A long-throw six-speed manual sourced from Getrag was the only transmission on offer in the CSi; when it first appeared in the 850i, this gearbox gained the distinction of being the first six-speed manual to be paired with a V-12 in a production road car. No matter the gear or speed, the mill bears no hesitation to hustle every one of its dozen pistons. The clutch is heavy and while acceleration isn't astonishing, the speedo climbs blissfully to 60 mph in slightly less than six seconds.</p>	
	4	<p>Brand: Mercedes Benz          Model: 170 V          Variant: W 136          Year of manufacture (yyyy): 1937          First registration (dd/mm/yyyy): 19/11/1937          Fuel: Gasoline          Odometer reading (kms): 21          VIN-number: 227651          Number of keys: 1          Vehicle category: M1: passenger car          Car type: Berline          Transmission: Manual transmission          Cylinder capacity cc: 1685          Motor power kW: 28          Emission class: Euro 1          Exterior color: Green          Metallic color: No          Interior color: Beige          Upholstery: Full leather          Additional information: The vehicle has been totally restored.          The engine has been restored.          21 km after restoration.          The restoration has original parts.          Certificate of registration: Yes, present          Certificate of Conformity: Yes, present          Visible vehicle damage: No, with the exception of general</p>	9.000 €

usage damage. (General use damage includes all damage that may be expected given the age and the mileage or hours.) For a detailed overview, you can always consult the photo report.

The Mercedes-Benz E-Class is a success story with a great tradition. One of its forebears is the Mercedes-Benz 170 V, which was presented to the world public in February 1936. Driving comfort, downsizing and lightweight construction: these were just some of the features of this car, which also impressed with its new four-cylinder engine and spacious interior despite compact dimensions.

15 February 1936 was an important day for Mercedes-Benz. At the International Automobile and Motorcycle Exhibition (IAMA) in Berlin, the brand for the first time presented the completely newly developed 170 V (W 136), an extremely modern vehicle in the upper medium class.

The 170V was in fact the only Mercedes-Benz to have been revived even after the end of the Second World War.

Early 1936 the 170V (W136) was presented. V for "Vorn" (German for front), since the engine was situated in the front. The four-cylinder side-valve 170V had rear wheel drive and a four speed gearbox. Although the capacity (1.7 liter) was similar to that of its predecessor, this engine was considerably more powerful. The output was 38 hp (28 kW), at 3,400 rpm, fuel consumption was 1:10.

Technical and stylistically the 170V was modern for its time, and sold for a lower price. A great variety in bodywork was offered: four door saloons, convertible limousines and vans, two door two- and four seaters, convertibles, roadsters and pickups. From 1936 to 1942 more than 75,000 Mercedes-Benz 170V were sold.
